

Press Release

November 2010

Largest PV manufacturer in France to speak and exhibit at Energaïa

Tenesol, the global solar power provider owned by energy giants TOTAL and EDF, will showcase its latest PV innovations and turnkey solutions at the Energaïa 2010 exhibition in Montpellier, France. During the event Tenesol will also take part in a conference discussing the future of the French solar PV industry, organised by Enerplan, the French solar energy association.

Based in Lyon, Tenesol is the largest PV manufacturer in France and has more than 27 years' experience as a turnkey PV solutions provider. Leading the company's exhibit will be its new dual-glass module, the TE Lumex Design – an entirely tailor-made PV module that gives architects the freedom to create unique building integrated PV installations.

In addition to exhibiting, Tenesol will present at the *International conference on solar PV in France: perspectives 2011-2012* on Thursday 9th December in the conference centre. Pascal Choffez, commercial manager for architects at Tenesol and vice-president of Enerplan, will speak at the event.

Energaïa is the leading renewable energy and sustainable construction event for national and international businesses. It will take place between 8th and 11th December 2010.

“With offices located across the country and our production facility in Toulouse, Tenesol is the leading producer of PV products in France,” says Benoit Rolland, Managing Director at Tenesol. “While we continue our global expansion, we must reinforce our position in the market. I look forward to welcoming visitors to our stand and demonstrating how our advanced PV solutions can suit almost any requirement and be delivered on a turnkey or trading basis.”

In addition to its work as a turnkey systems provider, Tenesol works with distribution networks that manage residential and consumer sales. Over 27 years, the company has gained the knowledge and understanding to ensure its advanced modules are competitively priced and its after-sales service responds to the market's needs while supporting its network of dealers.

Tenesol will be located in **Hall 12, Booth B401** at Energaïa. A selection of company representatives will be on hand to welcome visitors and discuss both turnkey and distribution services.

Energia 2010 will feature around 450 of the world's leading organisations from the renewable energy and eco-construction sectors. More than 30,000 people are expected to attend.
