

Press Release

8th February 2011

Tenesol to exhibit and speak at Salon des Energies Renouvelables in France

Tenesol, the global solar power provider owned by energy giants TOTAL and EDF, will showcase its wide range of residential and commercial PV solutions at Salon des Energies Renouvelables (EnR) 2011 in Lyon, France. The company, which is the leading PV operator in France (turnover and production capacity), will also take part in the *PV: Structuring Elements of Today's Architecture* conference (Tuesday 15th February, 11.00 – 12.30) organised by Enerplan, the French solar energy association.

Tenesol has exhibited at EnR since its inception 10 years ago. The company, which has a 27 year history, will display its latest PV innovations including a new product for large rooftop installations and a new solution for residential PV systems (S-TE Integra and S-TE Integra Max) that is eligible for the highest available feed-in-tariff, announced in January 2011.

A full-size model of the S-TE Integra solution will be on display, showcasing its simple installation, reinforced integration and watertight design.

The first day of the event is aimed at architects. Tenesol recently launched the TE Lumex Design module – a custom made dual-glass PV module designed to give architects freedom to create unique PV modules to suit specific project requirements.

EnR will have a major focus on Morocco including a 200m² stand in partnership with the Moroccan Ministry of Energy. Tenesol has been present in the Moroccan market for almost 10 years. It has delivered both turnkey solutions and residential products in the country. As a result, Khalid Semmaoui, general manager of Tenesol Morocco, will attend the event to meet with customers and show visitors.

EnR is the largest renewable energy fair in France. More than 600 exhibitors will take part in the event, which is taking place between 15th – 18th February 2011.

Tenesol will have an 80m² booth located at **Stand 7F06**. A selection of company representatives will be on hand to welcome visitors and discuss residential, turnkey and distribution services.

-ENDS-

[About Tenesol](#)

A rapidly expanding global player in the field of solar energy (*with a turnover of €300 million in 2010, +30% per year for 3 years*), Tenesol works on behalf of businesses, local authorities and private individuals. For more than 27 years, Tenesol has been engineering, designing, manufacturing, installing and managing solar energy systems including production and consumption of supplied systems (*Off-grid sites, general grid supply via direct connection, solar water heating*) for its customers around the globe. A benchmark player in its sector, Tenesol currently has a staff of over 1,100 employees across 20 subsidiaries including two production facilities, one in Toulouse (France), the other in Cape Town (South Africa).
